

# LV and MV Fuses – 1.5 Hours

**Description** – This training module is designed to familiarize students from beginner or expert with understanding the essential elements of LV and MV Fuses.

**Buy It Now**

## **Learning Objectives:**

Upon completion of this course, the student will be qualified to:

- Understand the Fuse basics
- Identify the composition of fuses
- Understand the how a fuse interrupts a fault
- Understand the different types of fuses
- Identify the different fuse classifications
- Discern between MV Expulsion and Current limiting Fuses
- Recognize the different manufacturers
- Understand the selection factors for fuses.

## **Outline**

- Fuse Basics
- Why Fuses?
- Types of Faults
- Fuse Composition
- Types of Fuses
- Ratings
- Fuse Classes
- Medium Voltage Expulsion Fuses
- Medium Voltage Current Limiting Fuses
- Application Information
- Application Uses
- Manufacturers
- What's new
- LV Selection Factors
- MV Selection Factors
- Summary
